The PSC may take the 30(b)(6) deposition of Sanofi limited to the following topics:

- (1) Sanofi's follow up on Individual Case Safety Reports ("ICSRs"). This may include whether and how Sanofi followed up on particular ICSRs, whether such follow up was documented and whether such documentation exists and was provided to the PSC in this litigation and, if not, the extent of the effort made by Sanofi to locate such documentation. Questions concerning the retention policies pertaining to such documentation are outside the scope of this order. To the extent the PSC plans to use particular ICSRs in the deposition, it must identify them in advance of the deposition in sufficient time

to allow Sanofi to appropriately prepare a corporate designee to testify about that ICSR and/or Sanofi's follow up to it.

- (2) Communications between Sanofi and Taxotere patients relating to the possibility of legal action for ongoing alopecia similar to those identified in Sanofi_05442744, and any reviews, investigations, reports of cases or incidents related to ongoing alopecia by "Risk Management" as noted in Sanofi_05442744. Questions concerning retention policies for such documents are outside the scope of this order.
- (3) The 10 Sanofi legacy files referenced in the PSC's email to the Court and counsel for Sanofi of February 4, 2019. Questions regarding retention policies or schedules for these files is outside the scope of this order.
